**Re: Yosemite Creek Superfund Site, San Francisco, CA
Amended Response to 104(e) Information Request**

Dear Mr. Whitenack:

This letter responds to correspondence of August 24, 2010 ("Follow Up Request") following up on the October 15, 2009 request for information ("Request") from the United States Environmental Protection Agency ("EPA") directed to Hewlett Packard Company ("HP") regarding the Yosemite Creek Superfund site (the "Site").

The Follow Up Request states, generally, that the information provided by HP in its January 8, 2010 response to the Request ("Response") is either non-responsive or only partially responsive to certain questions in the Request. As stated in the Response, HP conducted an extensive investigation to respond to the request of the California Department of Toxic Substances Control ("DTSC") of 1992 for information pertaining to the Bay Area Drum Superfund Site ("BAD Site"), which is the site of primary focus of the Request. Additional investigation conducted by HP in preparation of the Response revealed no new information about the BAD Site beyond the comprehensive search conducted in 1992, a search conducted in much closer proximity to the timeframe of operations defined in the Request as relevant.

Since receiving EPA's Follow Up Request, HP has reviewed the Response and attempted to locate additional information that may be further responsive to the questions in the Request. Specifically, HP searched for and located reports and other information pertaining to the HP

facilities, identified in response to Request No. 2, that on one or more occasions shipped empty drums to, or received empty drums from, the BAD Site. The attached documents are among those were generated in the context of remediation of those facilities. The attached documents are being produced as they contain information most likely to be responsive to questions set forth in the Request.

If you have any questions regarding the foregoing, please do not hesitate to contact me.

Sincerely,

Sharon Oras Morgan
